
Gurdwara Guru Granth Sahib Punjabi School
Cyber Attack Contingency Plan

Purpose: This policy outlines the steps to take if the Punjabi School experiences a cyber attack. Since all teachers are volunteers, this plan is simple and easy to follow.

1. Identify the Problem

- If you notice unusual activity (e.g., hacked email, website issues, or lost access to online resources), report it immediately.
- Contact the school management team.

2. Stop the Attack

- If possible, log out of all affected accounts.
- Change passwords for email, online class platforms, and other important accounts.
- Disconnect any compromised devices from the internet.

3. Report the Issue

- Inform the school management team.
- If personal data is at risk, notify affected individuals.
- If necessary, report the attack to local authorities.

4. Recover and Secure

- Restore any lost files or information from backups.
- Scan computers for viruses or malware.
- Update security settings, including stronger passwords and two-factor authentication.

5. Prevent Future Attacks

- Avoid clicking on suspicious links or downloading unknown files.
- Use strong passwords and do not share them.
- Educate teachers and students about online safety.

By following these steps, we can protect our school and keep our classes running smoothly.
